CLASS DIAGRAM RELATIONSHIP

Inheritance / Extends

Departemen Teknik Informatika & Komputer

37

Politeknik Elektronika Negeri Surabaya

Inheritance

- Inheritance adalah pewarisan antar class parent terhadap child
- Disebut juga Extends
- Yang diwariskan adalah semua variable dan method
- Yang tidak diwariskan adalah constructor, variable dan method dengan modifier private atau default(unspecified)
- Dalam class diagram ditandai dengan garis relationship sebagai berikut:

 Jika class Child inherit terhadap class Parent maka child memiliki semua variable dan method yang dimiliki paret kecuali yang private dan default(unspecified) serta constructor.

CLASS DIAGRAM RELATIONSHIP

Realization

Departemen Teknik Informatika & Komputer

41

Politeknik Elektronika Negeri Surabaya

Realization

- Realization terjadi antara Class dengan Interface.
- Sama dengan class, Interface dapat memiliki variables dan methods.
- Namun Interface hanya bisa memiliki method Abstract.
- Variable yang dideklarasikan dalam Interface harus public, static & final

Departemen Teknik Informatika & Komputer

Politeknik Elektronika Negeri Surabaya

Realization

- Menggambarkan Interface dalam class diagram sedikit berbeda dengan class yaitu dengan menambahkan kata interface diatas nama interface
- variable static dituliskan dengan tanda underline/garis bawah
- Variable final dituliskan dengan huruf Capital semua. Dengan pemisah antar kata menggunakan underscore
- Method abstract ditandai dengan tulisan italic/miring

<<Interface>> IDataManager

- + DB NAME: String
- + TABLE NAME: String
- + addData(): void
- + readData(): void
- + updateData(): void
- + deleteData(): void

Departemen Teknik Informatika & Komputer

Politeknik Elektronika Negeri Surabaya <<Interface>> UserController Realization **IDataManager** + DB NAME: String + addData(): void + TABLE_NAME: String + readData(): void + addData(): void + updateData(): void + readData(): void + deleteData(): void + updateData(): void + deleteData(): void Ketika terjadi sebuah realization terhadap sebuah interface, maka class yang merealisasi wajib mengimplementasikan semua method abstract yang dimiliki oleh Interface. UserController wajib merealisasikan method addData(), readData(), updateData(), deleteData() Method yang ditulis miring/italic menunjukkan Jika UserController tidak mengimplementasikan bahwa itu adalah method abstract. Sedangkan semua method abstract milik Interface method yang ditulis tegak/normal menunjukkan IDataManager, maka UserController juga harus itu method concreate/nyata. menjadi Interface atau Abstract Class.
